

Marlborough St. College Park

Adelaide, Jan 21st 1898

C. R. Hodge Esq

Registrar, Adelaide University

Sir

I am anxious that my son, who will be
fifteen years of age on April 11th next, should
take up the University Course of Study for
the B. Sc. degree and the diploma for Mining
Engineering & Metallurgy from the Commencement
of the next term. - Seeing that he will very
soon attain the legal age, I shall be
glad to know if the Council of the University
will grant a special permission enabling
him to become a matriculated student
at the Commencement of the next term: or
failing this, would any other course enabling
him to make effective use of the current
year in obtaining the degree be open to him?

My son passed in the following subjects
in the Senior examinations in December
last, English, French, Latin, German,
Mathematics, Geology & Chemistry

I am Sir

Yours faithfully

T. Greenway
