The position of influenza at the North Head is being maintained at the same level, and the mortality has been maintained at the same level. The mortality has been maintained at the same level, and the position of influenza is being maintained at the same level.

EXCELLENT RESULTS.

NO DEATHS FROM 200 CASES.

TREATMENT AT NORTH HEAD.

The Minister for Public Health, Dr. J. D. Fitzgerald, has received through the Director-General of Health a letter from Dr. Reid, the chief quarantine officer, to the effect that the treatment of pandemic influenza at the Quarantine Station, North Head, with sodium lactate, 15 grains given four hourly, and a vaccine containing 150 million influenza bacilli and 50 million pneumococci has given excellent results. There have been no deaths in the last 200 cases treated. The treatment, it is understood, has been so far exclusively used at the North Head Quarantine Station.

MEMORANDUM FOR THE DIRECTOR-GENERAL OF HEALTH.
